Skills

Languages: Java, JavaScript, PHP, PL/SQL

Backend: Node.js, Symfony, REST APIs

Frontend: React, HTML/CSS, Bootstrap

Mobile: React Native, FlutterFlow

Enterprise Java: Java OOP, JavaFX, WebSocket

Databases: MySQL, PL/SQL, Firebase

ORM: Doctrine ORM, Twig, JDBC

DevOps: Docker, Git, Postman, Trello

Testing: PHPUnit, JUnit

Design: Figma

Certifications

Meta (Coursera) Front-End Track

2024–2025: React Native, React, JavaScript, HTML & CSS, Git

Languages

Arabic — Native
French — Professional
English — Professional

Volunteering

IEEE ISIMA — Logistics Manager
JCI Ksour Essef — Project Coordinator
DevOps Community — Active Member

Profile

Software Engineering student at ESPRIT with hands-on full-stack experience across web and mobile. Delivered two real-world products during internships using Node.js, Symfony, React Native and Firebase. Strong OOP foundations in Java — completed a full JavaFX desktop application with WebSocket integration. Comfortable with clean architecture, REST API design, and delivering reliable software from concept to production.

Experience

Mobile / Full-Stack Developer Intern (PFE) — ARSII

2025 • *BiteWise* — *Digital Nutrition Coach Platform*

- Delivered a role-based platform for clients and nutrition coaches with 5 core modules: dashboards, coach discovery, requests, and messaging.
- Built backend/API features using Node.js + Firebase (auth, profiles, meal logs, requests, messaging endpoints).
- Produced UX flows and UI prototypes in Figma, translating them into responsive screens with consistent navigation.

Intern Developer — Dundill

Jun 2024 – Aug 2024

- Contributed to a web app using HTML, CSS, JavaScript, Bootstrap, and React; improved UI responsiveness across devices.

Projects

AgriSmart — Agricultural Marketplace (Java/JavaFX)

Java • JavaFX • OOP • WebSocket • JDBC • MySQL • JUnit

- Built a multi-role desktop application (farmers, suppliers, employees, admins) applying OOP design patterns: MVC, Factory, Singleton.
- Implemented real-time features using WebSocket, JDBC persistence with MySQL, form validation, and PDF/Excel exports.
- Wrote JUnit tests to ensure reliability and maintainability across core modules.

AgriSmart — Agricultural Marketplace (Web)

Symfony • Doctrine ORM • Twig • Bootstrap • MySQL • PHPUnit • Docker

- Developed a full-stack marketplace with listing management, order workflows, cash-on-delivery and API-ready card payment.
- Integrated an AI chatbot and recommendation system to improve product discoverability.
- Maintained scalable structure via Symfony/Doctrine best practices with PHPUnit test coverage.

Delivery Mobile App

FlutterFlow

- Built a delivery app with clean UI/navigation: order capture, status updates, validation, and structured data entry.

Secure Multi-Site Network Infrastructure Lab (GNS3)

OSPF • GRE/IPsec • NAT • DHCP • ACLs • Apache/MySQL/NFS • Prometheus/Grafana

- Designed a multi-site topology with OSPF backbone routing, GRE/IPsec VPN, and ACL-based segmentation.
- Deployed services and implemented monitoring with Prometheus + Grafana dashboards and alerts.

Education

ESPRIT — Engineering Degree (Software Engineering), 1st Year

2025 – Present

ISIMA — Bachelor in Computer Systems Engineering

Graduated 2025
