Skills

Mobile/Web: React Native, FlutterFlow, React (basics), HTML/CSS, JavaScript
Backend: Symfony (PHP), Node.js (REST APIs), Java (OOP)
Data/Tools: MySQL, MongoDB, Doctrine ORM, Twig, Bootstrap, Git, Postman, Trello, PHPUnit, Docker

Certifications

Meta (Coursera) Front-End track (2024–2025): React Native, React Basics, JavaScript, Version Control, HTML & CSS.

Languages

Arabic (Native) • French (Professional) • English (Professional)

Volunteering

IEEE ISIMA — Logistics Manager
JCI Ksour Essef — Project Coordinator
DevOps Community/Club — Active Member

Profile

Computer Engineering graduate (ISIMA, 2025) and currently a Software Engineering student at ESPRIT. I build mobile and web applications across the stack (Symfony/PHP, Node.js, React Native, FlutterFlow) with a focus on clean architecture, maintainability, and reliable delivery.

Experience

Mobile / Full-Stack Developer Intern (PFE) — ARSII

2025 • BiteWise — Digital Nutrition Coach Platform • Figma: figma.com/design/.../pfe

- Delivered a role-based platform for clients and nutrition coaches (tracking dashboards, coach discovery, requests, messaging).
- Built backend/API features using Node.js + MongoDB (auth, profiles, meal logs, requests, messaging endpoints).
- Produced UX flows and UI prototypes in Figma and translated them into implementable screens with consistent navigation.

Intern Developer — Dundill

Jun 2024 – Aug 2024

- Contributed to a web app using HTML, CSS, JavaScript, Bootstrap, and React; improved UI responsiveness.

Projects

AgriSmart — Agricultural Marketplace Platform

2026 • Symfony • Doctrine ORM • Twig • Bootstrap • MySQL • PHPUnit • Docker

- Developed a marketplace for farmers, suppliers, employees, and administrators to publish listings and manage orders.
- Built listing workflows for sale vs rental with real-time preview, conditional fields, and robust client/server validation.
- Implemented order workflows with cash on delivery and API-ready card payment integration; added PDF/Excel exports for reporting.
- Integrated an AI chatbot and contributed to a recommendation system to improve guidance and discoverability.
- Improved reliability with PHPUnit tests and maintained scalable structure via Symfony/Doctrine best practices.

Delivery Mobile App (FlutterFlow)

FlutterFlow

- Built a delivery mobile app focusing on clean UI/navigation and fast iteration.
- Implemented core workflow screens (order capture and delivery status updates) with validation and structured data entry.

Secure Multi-Site Network Infrastructure Lab (GNS3) — Integrated Project

OSPF • GRE/IPsec • NAT (PAT) • DHCP • ACLs • Apache/MySQL/NFS • Prometheus/Grafana

- Designed and validated a multi-site topology with OSPF backbone routing for inter-site connectivity and redundancy.
- Implemented GRE/IPsec VPN and ACL-based segmentation; enabled Internet access via NAT (PAT) and addressing via DHCP.
- Deployed services (Apache web, MySQL, NFS) and implemented monitoring with Prometheus + Grafana + Node Exporter dashboards and alerts.

Education

ESPRIT — Engineering Degree (Software Engineering), 1st year

2025 – Present

ISIMA — Bachelor in Computer Engineering

Graduated 2025
